Software Engineering graduate seeking to apply technical knowledge and practical development skills in a challenging software development role. Dedicated to building reliable, user-focused applications while continuously improving technical expertise. With hands-on experience in mobile and web development and a strong learning mindset, I aim to contribute to impactful software solutions in a dynamic environment.

EDUCATION

UOG - University of Gujrat

BS in Software Engineering

2022 - 2026

Cumulative GPA: 3.12

WORK EXPERIENCE

Astapor Technologies

Mobile Application Developer

Sialkot, PK

Sep 2026 – Present

- Developing cross-platform mobile applications using React Native.
- Building features, integrating APIs, debugging issues, and improving app performance.

AR Shanwari Hujra

Manager & Software Developer

Sambrial, PK

June 2026 – Sep 2026

- Managed daily restaurant operations, including staff coordination, customer service, order management, and overall workflow.
- Designed and developed a customized POS system for restaurant operations and am currently developing a mobile application to improve ordering, management, and customer experience.

Techno Fortress Software House

Maintenance Mechanical Intern

Gujrat, PK

Nov 2025 – May 2026

- Developed mobile application features using Flutter and Dart, integrating Firebase for authentication and database management.
- Assisted in Laravel backend development and API integration, debugging software issues and supporting the development of real-world applications.

Fatima Public School

Teacher

Sambrial, PK

June 2024 – Aug 2024

- Taught secondary-level students, delivering lessons, explaining concepts, and supporting students in their academic development.
- Managed classroom activities, prepared learning materials, and maintained an effective and organized learning environment.

LEADERSHIP EXPERIENCE

UOG Software Engineering Society (UOG SES)

Event Organizer

UOG

Aug 2024 – Dec 2024

- Organized and managed university events, gaming competitions, and student activities, coordinating participants, schedules, and event logistics.
- Collaborated with society members and university administration to ensure the smooth planning and execution of multiple events sessions.

UNIVERSITY PROJECTS

Fixio - Rental & Marketplace Application (FYP)

Technologies: Flutter, Dart, Firebase

- Developed a mobile rental and marketplace application using Flutter and Firebase, enabling users to browse, list, and manage rental products through a user-friendly platform.

Learning Management System

Technologies: ASP.NET Core MVC, C#, SQL Server

- Developed a web-based system for managing students, courses, instructors, and academic activities.
- Implemented database-driven functionality for managing and organizing educational information..

Retail Inventory Management System

Technologies: SQL Server, Database Management

- Developed a system for managing products, inventory, stock levels, and sales-related records.
- Designed database functionality to organize and efficiently manage retail inventory.

University Admission Workflow Optimization

Technology/Methodology: BPMN

- Designed and optimized an administrative staff workflow using BPMN, achieving 70% process efficiency.

ADDITIONAL

Technical Skills Flutter, Dart, Firebase, HTML5, CSS3, Bootstrap, C/C++, ASP.NET Core MVC, SQL, MySQL, Git, GitHub, Node.js, VS Code.

Soft Skills: Problem Solving, Critical Thinking, Teamwork, Leadership, Communication, Adaptability, Time Management, Project Management, Debugging.

Certifications/Courses: WordPress Website Development - Coursera; Google Ads for Beginners - Coursera; Business Analysis & Process Management - Coursera.
